PRODUCT FACT SHEET / MALE BALL PIN WITH MOUNTING SLEEVE

SPECIFICATIONS

PRODUCT CODE	AMF-BC-MAL-MS-MS
MATERIAL	MILD STEEL
DESIGN	AMF

APPLICATION & MAINTENANCE

DESIGN AND APPLICATION

The AMF Male Ball Pin with mounting sleeve is a heavy-duty coupling designed to securely connect a pup trailer to the Female Ball Coupling mounted on a semi-trailer. The Male Ball Pin and weld-in mounting sleeve is locally designed and manufactured by AMF and is the market leading tanker pup trailer ball pin.

The Male Ball Pin is secured in place with the weld-in sleeve located on the gooseneck of the pup trailer, and locked into place with the male ball pin nut and split pin.

The AMF Male Ball Pin is made of a durable robust and sturdy construction and is known for its safety and reliability when hauling a pup tanker behind a semi-trailer.

The rotating of the ball on the Male Ball Pin creates an even wear, prolonging lifespan and down time.

The AMF Male Ball Pin must be used in conjunction with the AMF Female Ball Coupling.

MAINTENANCE

The AMF Male Ball Pin offers a good operational life and is easily replaced when worn or damaged.

Regular inspection and service is advised to ensure all wear and tear items are in good working condition

WARNING: Use only genuine AMF replacement parts. Substitute parts can impair the proper functioning of this product and void all warranties.
